"The Courage of Marge O'Doone"

GAIN IN DISEASES

First Six Months of 1920 Exceed Period in 1919.

Increase of 187 Cases Shown by City Health Report.

PHYSICIANS MORE VIGILANT

Promptness Reveals Larger Number Social Diseases.

Whooping Cough Without a Whoop Prevalent Here.

Influenza, measles, chickenpox, whooping cough and smallpox are responsible for the large increase of contagious diseases reported to the city health department this year over the number reported in the first six months of 1919, according to Dr. Earle G. Brown, city health officer, in a report made public today. The total to date this year is 3,321, as compared with 2,134 for the first half of 1919.

Of the diseases reported this year, 1,609 are influenza, while in the first six months of 1919, influenza cases numbered 1,325.

February was the month of illness in Topeka, 1,547 contagious diseases being reported. These cases were practically all of influenza, which totaled 1,371. February of this year was by far the worst month for sickness in the two periods covered by the report.

There has been a marked increase

SEARCH OUT THE GERMS OF RHEUMATISM

Find Out What Causes Your Suffering and Go After It.

"What is Rheumatism?" is a question that has not yet been answered entirely satisfactorily. There are still different opinions as to its exact cause, but little doubt that its pains are real. The medical profession is practically agreed upon one point, however, and that is that Rheumatism is more than a series of local pains, and that the real cause of the disease is deep seated, and cannot possibly be reached by remedies applied to the surface.

Some forms of this disease have been found to come from tiny germs in the blood, which set up their colony

in the number of social diseases in 1920 over the number for the first half of last year. In 1919, 63 cases of gonorrhea were reported in the first six months, while the number reported to date this year is 117 and will go to 250 before the end of the year, according to Brown. Syphilis jumped from 19 cases in 1919 (first six months) to 39 cases to date and will go to 100 cases by the end of the year.

"According to the figures given, it would seem that there was a large increase in venereal diseases and tuberculosis read the report, 'but it is thought the increase in numbers is simply due to the better reporting of cases by physicians.'"

Measles in Lead.

The totals to date for the four diseases (other than influenza) which have become epidemic this year follow:

Measles 562
Chicken pox 286
Whooping cough 280
Smallpox 80

Pneumonia jumped from two cases for the first half of 1919 to 109 cases so far this year, due, Brown explains, to the fact that the cases this year have been secondary to the acute infections, especially influenza, whooping cough and measles. Tuberculosis increased from 25 cases in 1919 to 65 cases so far this year.

Cough Without a Whoop.

"Whooping cough is epidemic over the whole city," says the report, "and it is claimed that many of the children do not whoop, yet they run the course of a typical whooping cough and these cases transmit the disease to others."

"The fly season is at hand, consequently the typhoid season. Topeka had a lower typhoid rate last year than in years, and to date this year but 5 cases have been reported. If any persons wishing inoculation against typhoid are financially unable to pay for such treatment, it will be administered at the city health department."

In the muscles, or joints and begin to multiply by the million. You can easily understand, therefore, that the only intelligent method of treating such cases is through the blood.

S. S. S. is such a thorough blood purifier and cleanser that it can be relied upon to search out all disease germs and impurities and eliminate them from the system, and this is why it is such an excellent remedy for Rheumatism.

Go to your drug store and get a bottle of S. S. S. today, and if your case needs special attention, you can obtain medical advice free by writing fully to Chief Medical Adviser, 602 Swift Laboratory, Atlanta, Georgia.

HAVE \$100,000,000 TIED UP

Farmers Urged to Delay Threshing by Stacking—No Cars for Fuel.

Hutchinson, Kan., June 24.—When the present wheat harvest is over, Kansas farmers will have approximately \$100,000,000 tied up in 1919 and 1920 crops. Of this amount the bankers have advanced \$65,000,000 up to the present time, on crops that have not been harvested. These were figures by J. R. Anspaugh, secretary of the Kansas State Bankers' association at a recent agricultural conference called by the state board of agriculture. But railroad officials could not deliver the grain to the banks' troubles by promising to furnish cars to market the crops readily. "The security is good but the money is hard to get," said Anspaugh.

In the resolutions adopted by the conference, wheat producers were "warned" of the necessity to prepare to hold in stack or bin, at least 60 per cent of the new crop. Even the possibility of the grain being sold at a loss was anything but hopeful, because of coal shortage in the wheat country. The conference's report drawn up by Secretary J. C. Mohler, said: "We are informed from reliable sources that practically no cars are available for the purpose of shipping threshing coal from the mines. In less than two weeks there will be a demand for at least 2,000 cars of threshing coal with practically none delivered."

HURT DIGNITY OF OFFICE.

City Fumigator Ordered by Police Matron to Clean Bathroom.

Halllock Hill, city fumigator, feels that the dignity of his office has been insulted. On the other hand, Mrs. B. Webb, police matron, is not satisfied. It is said, that Hill is doing all that the city pays him to do.

Tuesday the city health department received a call from Mrs. Webb, asking that somebody be sent down to fumigate the jail. Hill went.

"You can start in on the bathroom," the matron is said to have directed him upon his arrival. "Wash the tub and floor well."

This was a cruel blow to Hill's aforementioned dignity and perhaps there was a trace of hauteur in his tone as he replied.

"I am the city fumigator. Cleaning bathroom floors and tubs is not part of my work."

But, Mrs. Webb, it is said, was firm in her opinion that he had been sent down to clean the jail and a lengthy argument followed, during which Hill suggested that some of the healthy prisoners be delegated to the job. Finally the matron, still unconvinced, called up the health department and complained that the "mat" they sent refused to obey orders. It was explained to her, after more lengthy converse, that Hill's work was merely fumigation, but when she called at the health department later in the day, Mrs. Webb is said still to have been indignant that Hill did not clean the bathroom at the jail.

URGENT INSURANCE RENEWAL.

Government Agent Arrives in Topeka to Talk to Ex-Soldiers.

Capt. John C. Newman, representative of the bureau of war risk insurance in Topeka today to aid in interesting ex-service men in renewals of their government insurance policies. Men who have been discharged more than eighteen months must renew their policies by July 1.

Captain Newman stated today that up until June 1 there has been \$1,170 renewals among ex-service men in the state. Those wishing to make renewals should call at the attorney general's office at the state house, the local recruiting office at Sixth and Kansas avenue or the Red Cross office in the New England building.

ENTHUSIASTIC OVER HEALING.

Many Will Attend Grace Cathedral Services Next Fall.

The services for spiritual healing to be continued at Grace cathedral this fall will be largely attended, according to declarations of many of the 200 sick and afflicted who came to the last of the summer services at the cathedral Wednesday. Nearly all of them expressed their intention of attending the treatment at the later meetings, after having been present at every service beginning with the "laying on of hands" by James Moore Hickman at the cathedral in March.

A number of the applicants have reported that they have been helped by the service, Dean James P. deB. Kaye said.

AUGUSTA BOY IS DROWNED.

Fourth Death in River for Kansas County in Month's Time.

Eldorado, Kan., June 24.—James Williams, 12 years old, son of Mr. Nettie Williams, of Augusta, was drowned in the Walnut river near that town today while in swimming with a number of chums.

James swung out over the river by a suspended rope. The force of the swing was not great enough to bring him back to the bank of the stream and when he stopped swinging he was held suspended over the water, twelve feet deep. An attempt was made to extricate him but his hands slipped and he fell into the water and drowned. This is the fourth drowning in the county in less than a month.

25 YEARS AGO IN TOPEKA

From the Columns of THE TOPEKA STATE JOURNAL

June 24, 1895.

The regular June meeting and basket picnic of the Shawnee County Horticultural society will be held at the farm of W. P. Penney near Berryton on Thursday, June 27.

The union excursion to Fort Riley Tuesday, under the auspices of the Presbyterians of this city, Keosauqua and Wamego promises to be the popular church excursion of the season. Extensive arrangements have been made at Fort Riley to entertain the visitors with a military program.

The Ladies' Music club will meet with Mrs. F. E. Dietrich, 1331 Topeka avenue, next Wednesday afternoon. The members will play selections from American composers.

Miss Lois Telford and Miss Beale Harden are entertaining friends at a picnic at Garfield park this afternoon.

Will Bowen of the Sim drug store has gone to work at Pueblo, Colo.

GABY'S JEWELS EXHIBITED

Will Be Sold for Benefit of Marcellus Poor as Provided in Will.

Paris, June 24.—The jewels of the late Gaby Deslys, the famous French dancer and actress who died last February, were placed on exhibition here today, preliminary to their sale on June 28 for the benefit of the poor of the city of Marcellus as provided in Mlle. Deslys's will.

According to connoisseurs the collection comprises the finest assortment of pearls ever seen in Paris. Altho diamonds, rubies, sapphires, emeralds and other precious stones are adequately represented, they are not quite so conspicuous, the dancer's hobby being pearls.

One necklace contains fifty-seven pearls valued at several million francs and there are two pendant pearls weighing 109 grammes each, being absolutely the same in size and weight. Another pearl, black in color, weighs 140 grammes, while there are seven other pearls weighing from 70 to 100 grammes each. All the pearls were selected and matched with exquisite taste.

REPAIRS ON HUNTOON STREET.

City Taking Out Rough Spots and Waves On Strip Paving.

The Kaw Paving company is doing some strip work on Huntoon street at Clay today, smoothing up some of the rough spots, according to W. S. Hancock, street commissioner. The gang will be moved from there to East Seventh street where stripping will be done from the central fire station

for one block east. The Kaw company was hired to do the work. Hancock explained, because the city's own plant had too much work to do.

Later the city will repair Huntoon street further out where the street is "wavy." It will be necessary to dig up the asphalt and resurface the street there.

Use Coconut Oil For Washing Hair

If you want to keep your hair in good condition, be careful what you wash it with.

Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and is very harmful. Multified coconut oil shampoo (which is pure and entirely greaseless), is much better than anything else you can use for shampooing, as this can't possibly injure the hair.

Simply moisten your hair with water and rub it in. One or two teaspoonfuls will make an abundance of rich, creamy lather, and cleanses the hair and scalp thoroughly. The lather rinses out easily, and removes every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves it fine and silky, bright, fluffy and easy to manage.

You can get Multified coconut oil shampoo at most any drug store. It is very cheap, and a few ounces is enough to last anyone in the family for months.—Adv.

They Don't Clean Teeth

In Your Way Now—Not the Men Who Know

All Statements Approved by High Dental Authorities

They Now Combat the Film

Dental science has found a new way to clean teeth—a way that combats the film.

Able authorities have proved it for years in clinical and laboratory tests. The facts are beyond any question. Leading dentists all over America now urge people to adopt it, and a million or more have done so.

This method, for home use, is embodied in a dentifrice called Pepsodent. And this week we offer, to every home in this city, enough for a ten-day test. For your own sake you should make that test.

Why Teeth Discolor and Decay

You can feel on your teeth a slimy film. It is ever-present, ever-forming. It clings to the teeth, gets between the teeth, enters crevices and stays.

The tooth brush does not end it. The ordinary dentifrice does not dissolve it. So, night and day, that film may do ceaseless damage. And most tooth troubles are now traced to it.

That film is what discolors—not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. Also of many other troubles, local and internal.

You Must End It

Millions of people find that brushed teeth discolor and decay. Tartar forms and pyorrhea starts. Statistics show that, despite the tooth brush, tooth troubles have been constantly increasing.

The reason lies in that film. To prevent the troubles you must end the film. Let this ten-day test show you the way to do it.

Look at Your Teeth in Ten Days

The results are easily shown and we urge you to see them. Read how they come about. Then decide for yourself what is best for your teeth and for your children's teeth.

Present the coupon for a 10-Day Tube. Use like any tooth paste. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how teeth whiten as the fixed film disappears.

Compare the results with your present method. Remember that those whiter teeth mean cleaner teeth—teeth kept freer from film. Then decide for yourself about going back to former cleaning methods.

Make the test this week, while the 10-Day Tube is free. The result will be of lifetime importance to you. Cut out the coupon so you won't forget.

They Teach Children

how to really clean teeth, and how to combat the film which is the source of most tooth troubles.
